# People we work with..

# Achievement..

## The Goal

“..to make a major difference within the Substance Misuse sector through the development of innovate tools that work and offer a brilliant service that our clients can rely on – 24 X 7”

## The Achievement

We have created market leading systems that our client rely on these include the Largest Providers of Treatment Services, NHS Trusts, Prison Services and Peer Mentoring Support services

## More to do..

“...we need to turn more of the data into meaningful and targeted information that can then be used predicatively in a therapeutic environment.”

*We are already on the case..*

## What we believe in..

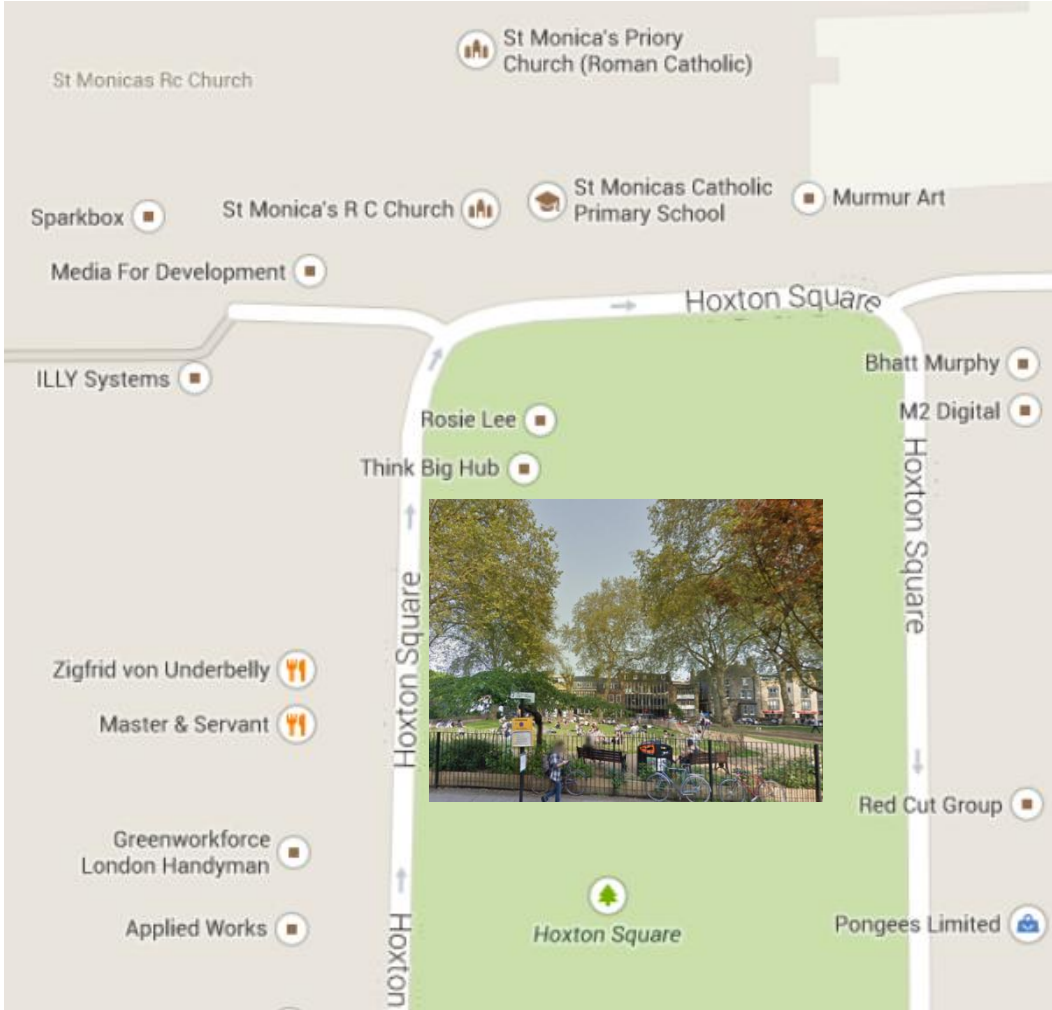

**Treat me the way you  
expected to be treated.**

**Fair and with respect..**

Things change all the time.  
Sometimes they even go  
crazy but we would still like to  
be treated reasonably.

# Success

**We will succeed** if we build Brilliant products and offer a great service

If we are going to develop and deliver something then it has to be note worthy - what is the point otherwise?

# Likes and don't likes

**Food cook-offs** – like the different foods even the disasters!

**Snowdon Trips** – except Crib Goch ridge

**Gong** – Feel proud when we get to hit it.

**Support** – I get a lot of support and help.

**Team**– I'm part of something special

**Hitting the Gong** – embarrassed but ok.

**Air con** – temperature is variable.

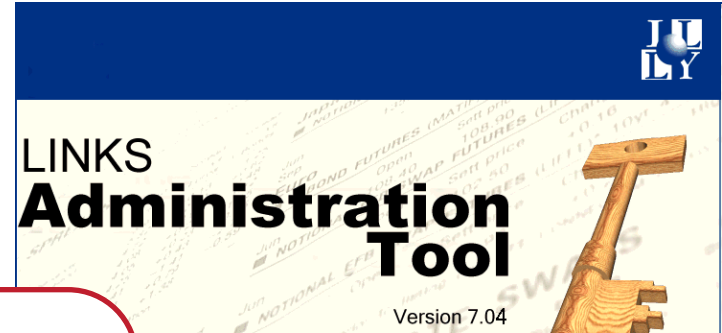

**Time** –there is never enough.

**Meetings** – sometimes we have one too many

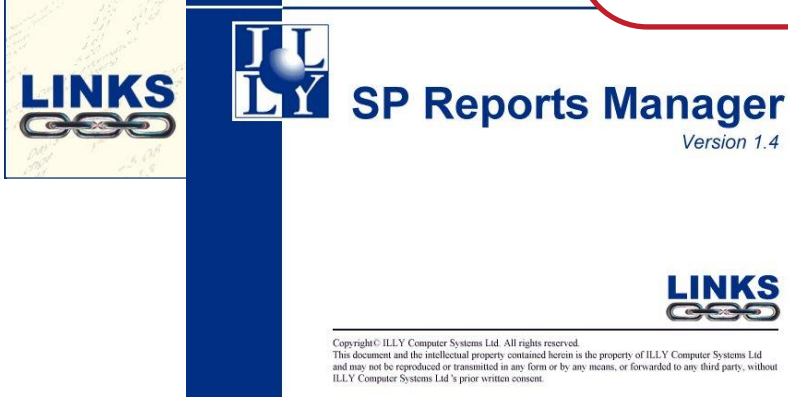

**Lot to do** – its pressured stuff we do, but we must get on with it.

# Developer Test

10. Your program has a **Customer** entity. A **Customer** has many **Orders**. To improve efficiency orders are loaded lazily (i.e. only when required). What potential inefficiencies might occur with these statements? How might you avoid these issues? (5 marks)

```

1  var customer = LoadCustomer(35);
2  foreach(var order in customer.Orders)
3  {
4      Console.WriteLine(order.OrderDetails);
5  }

```

11. Implement `IGetMatchingCars` using LINQ extension methods. The return object should be an anonymous object with the following properties: `{int Id, string RegistrationDate, int Miscellaneous}`

```

1  public class Car
2  {
3      public int Id { get; set; }
4      public string Registration { get; set; }
5      public DateTime DateOfRegistration { get; set; }
6      public string[] MiscFacts { get; set; }
7  }
8  public interface IGetMatchingCars
9  {
10     IEnumerable<object> GetMatchingCars(IEnumerable<Car> cars, int
11 }

```

*We want developers who want to succeed*

# Customers are the Reason we Exist

We believe that if we *focus* and do the *right things* for our *customers* then we will thrive and succeed.

## What we believe in Team Work

Teams – Our best work is done in **Teams**

We work **together** with the same goal.

The individual is at the **heart** of what we do  
but together we are greater than the sum of  
the individuals.

# Change the World

## Never give up

Keep focused and bit by bit we will get there.
